

Setting FCAT Developmental Growth Goals

Instructions: Locate student's FCAT Developmental Scale Score (DSS) in the Last Year DSS column. Add the number from the 1 Year DSS Growth column to the last year DSS score to determine how much growth the student needs to earn to demonstrate 1 year's growth relative to his performance last year. Add the DSS, the 1 year growth number, and the second year growth number to determine how much growth a student needs to earn to demonstrate 2 year's growth.

$$1 \text{ Year's Growth} = \text{Last Year DSS} + 1 \text{ year growth}$$

$$2 \text{ Year's Growth} = \text{Last Year DSS} + 1 \text{ year growth} + 2 \text{ year growth}$$

Grade Level Last Year's Reading Performance is Like	Last Year's FCAT Developmental Scale Score (DSS)	DSS Growth		On-Grade Level Developmental Scale Score
		1 Year	2 Year	
Comprehending Text Below 3rd Grade Level	86-1202	Last Year 1 Year <u>+269</u>	Last Year 1 Year 269 2 Years <u>+166</u>
