

Designed for nonreaders, this course lays a solid mathematical foundation as students learn important math concepts and skills that they'll need to understand the world around them. In 30 sessions, they count from 1 to 100, identify shapes, add and subtract, compare and order numbers, and explore the concepts of money and time.

Destination Math™

Mastering Skills & Concepts I: Pre-Primary Mathematics **grades K-1**

Scope and Sequence

1 NUMBER SENSE

- 1.1 Numbers from 1 to 5
 - Counting from 1 to 5
 - Creating sets of 1 to 5
 - Creating representations of the numbers from 1 to 5
- 1.2 Numbers from 1 to 10
 - Counting from 5 to 10
 - Creating sets of 5 to 10
 - Creating representations of the numbers from 5 to 10
 - One More Than
 - One Fewer Than and Zero
- 1.3 Numbers to 100
 - Counting from 10 to 20
 - Counting from 20 to 50
 - Counting from 50 to 100
 - Skip-Counting by Tens and Fives
 - Skip-Counting by Twos
- 1.4 Comparing and Ordering
 - More Than, Less Than, or the Same
 - Comparing Numbers within 100

2 ADDITION AND SUBTRACTION

- 2.1 Addition
 - Combining and Joining within 10
 - Comparing within 10
 - Sums within 20, with 10 as one addend
 - Sums within 20
- 2.2 Subtraction
 - Differences within 10
 - Differences within 20

3 GEOMETRY AND MEASUREMENT

- 3.1 Measurement
 - Length
 - Weight
 - Clock and Calendar Time
 - Money
- 3.2 Geometry
 - Triangles and Rectangles
 - Three-dimensional shapes

4 ALGEBRAIC THINKING

- 4.1 Patterns and Displays
 - Shapes
 - Number Patterns
 - Tables and Graphs
