# PCI Reading Program Correlations to the Florida Access Points

The *PCI Reading Program* is a research-based curriculum created specifically to teach students with developmental disabilities, autism, and significant learning disabilities how to read. Levels One and Two teach 280 sight words and real-world nouns and verbs through a comprehensive system of repetition, hands-on practice, controlled-vocabulary reading, and high-interest activities.

Both levels of the PCI Reading Program have been correlated to Florida's Reading and Language Arts Access Points for Kindergarten through Grade 8. This core reading program places a strong emphasis on vocabulary, fluency, and comprehension skills, with phonemic awareness and phonics skills introduced in developmentally appropriate ways. The following pages show how each major component of the program aligns with the Florida Access Points for Reading and Language Arts.

Level One is designed as a one-on-one program and takes at least one full school year to complete. In Level One, students learn 140 of the most basic sight words from the Dolch and Fry lists. Students progress from reading individual words to 8–12 word sentences. Level One includes 28 books, ranging in length from 8 to 12 pages. By the end of Level One, nonreaders will have progressed to approximately a 1.0 reading level.

Level Two is designed as the next step for students who have completed Level One. It teaches 140 additional sight words and real-world nouns and verbs, advancing students from a 1.0 reading level to a 2.0–2.5 reading level. While Level Two's focus is still on teaching words through visual discrimination, it also introduces students to wrapped text, common inflectional endings such as *-s*, *-ing*, and *-ed*, and compound words.
