

These are the directions for setting the Station ID on the Brother MFC-8220.

At the device's console:

1. Press MENU
2. Press 0
3. Press 3
4. Set the Fax: as the local fax number (format should be 561XXXXXXX Not a PX) Press SET
5. Set the Tel: as the number of the contact person (format should be 561XXXXXXX Not a PX) Press SET
6. Set the Name: as the local area. For example if you are located in the Glades, it should be set as WEST GLADES.  
*You type each character using the number keys... You press the number as many times as it calls for the letter. For instance, if you want to type the letter S you would press the 7 button three (3) times. It would then display the letter. Use the Right arrow button on the Navigation Wheel to make a space between words. If at any time you make a mistake, simply use the BACK button as the backspace.*

Any questions please contact:
