<small>* Standard Contact Lens Fitting - spherical clear contact lenses in conventional wear and planned replacement (Examples include but not limited to disposable, frequent replacement, etc.) ** Premium Contact Lens Fitting - all lens designs, materials and specialty fittings other than Standard Contact Lenses (Examples include toric, multifocal, etc.) † LASIK and PRK correction procedures are provided by the U.S. Laser Network, owned by LCA-Vision. You must first call 1-877-5LASER6 for the nearest facility and to receive authorization for the discount.</small>		

Lens Options

You can choose from many different lenses and lens options for your frames at participating EyeMed provider locations. Here are just a few of the lens options you may find at participating provider locations:

- Ultra Violet (UV) Protection – UV rays can be generated from the sun or other light sources. With enough exposure to these light rays, there could be an increased risk of cataracts and macular degeneration. UV protection helps to prevent these rays from harming the eye.
- Anti-Reflective (AR) Coating – This coating reduces the amount of light that reflects off the lenses. These lenses can be particularly helpful for driving at night, when reflections on your lenses may be greater than daylight driving conditions. AR coating also enables people to see your eyes more clearly as opposed to seeing the reflection off your lenses.
- Scratch-Resistant Coating – When scratches are present on your lenses, they may distort or interfere with your vision. This protective coating is added to the lens surface to protect it from normal scratches as a result of everyday mishaps. It's a great way to extend the life of your eye wear.
