Parents and Caregivers,

Skills for Learning and Life (SLL) cultivates skills and fosters attitudes that support college, career, and life success. In addition, SLL strengthens teaching and learning of academic content, builds confidence, and supports our overall wellness.

The School District of Palm Beach County’s SLL Framework is based upon required Health Instruction as outlined in Florida State Statute 1003.42(2)(o)(4) and involves acquiring and effectively applying knowledge, attitudes, and skills of self-awareness and self-management, responsible decision-making, resiliency, relationship skills (including conflict resolution), and social awareness (including understanding and respecting other viewpoints and backgrounds). In addition, the SLL Themes help students work towards achieving the outcomes of the Florida Resiliency Education Standards.

During October and November we will be working on our second SLL Unit: “Being Resilient”. In this unit, students will learn that things in life don’t always go as expected. The first part of this unit focuses on how challenges can serve as opportunities for growth as well as the importance of staying focused and motivated to accomplish a goal or task. Students will learn that when faced with a problem they can use the steps of a problem solving process to solve it or when they need to ask for help. In addition, students will learn how expressing gratitude can strengthen relationships and improve their overall health and happiness. Students will learn how to use the Super Problem Solving steps when they are faced with a challenge.
