

Additional ABC Recommendations for Superintendent Consideration

The Advisory Boundary Committee not only recognizes the importance of community input concerning boundary adjustments, but also the input received from Committee Members.

The following are additional recommendations for consideration by the Superintendent alongside Amended Study 7, as recommended to the Superintendent by an 8-6 vote by the Committee at their 1/12/2023 meeting. These recommendations are not intended to further revise Amended Study 7 or to generate an additional study. They are intended to capture Districtwide concerns by the: 1.) ABC committee members and 2.) The community as they pertain to high schools and students.

Concerns of the Committee

- Allow for rising juniors to remain in their current schools, in addition to the rising seniors and their siblings
- Provide for additional resources at Boynton Beach Community High School
- Ensure sufficient resources for Dr. Joaquin Garcia High School
- Attempt to achieve optimal utilization and/or accommodate space requirements for current and/or future programmatic needs.
- Continue to enforce Policy 5.011, to include Park Vista High.

Community concerns heard by the Committee

- Consider SAC 227C traffic safety concerns.
- The feeder pattern for SAC 227C isolated them from their Christa McAuliffe Middle peers to Park Vista High School.
- Study 7 does not address the concerns of Greenacres officials and parents and has Greenacres students going to five different high schools.
- Students that have auditioned for, or in a merit-based program, should be given the opportunity to remain at their current high schools to complete their programs.
